

**We know compliance.**  
Argent is a commonsense solution provider that has offered EHS consulting and powerful compliance management software solutions since 1993.

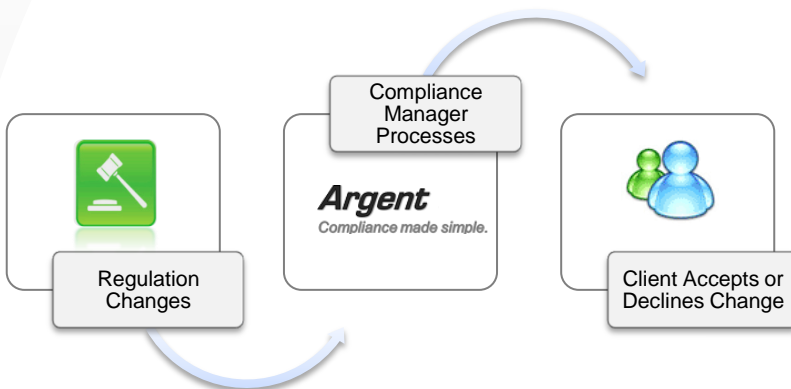

**We're problem solvers.**  
Regulated companies encounter the problem of determining which tasks are related to their specific compliance requirements, then try to determine which tasks require changes. The challenge of managing these problems can become an expensive and time-consuming nightmare.

**We keep things simple.**  
Argent software engineers have created a software system that builds the tasks by simply identifying which rules apply.

## Easy as 1, 2, 3...

- 1 Regulatory agency adds, deletes, or updates a regulation
- 2 Argent receives changed regulation and develops applicability profile utilizing Evergreen Compliance Manager's Impact Analyzer tool
- 3 Impact analyzer sends applicability profile notification to all client sites with new regulation language, specific site applicability, and new associated tasks

## Scheduling tasks made simple...

- 1 Tasks are driven by the regulations and automatically updated to reflect regulation changes and ensure your compliance program stays evergreen
- 2 Assign multiple tasks to multiple personnel. Easily integrate personnel changes into compliance program with one button
- 3 Delegation and escalation features help your business stay on top of managing resources, ensuring accountability and on-time task completion

## Communication is a breeze...

- 1 Web-based access provides for an anytime, anywhere compliance solution
- 2 Email client system notifies responsible parties about upcoming tasks, complete tasks directly from email
- 3 Attach documents to completed tasks with unlimited storage, communicate compliance documentation and results in seconds

## Powerful compliance reporting at your fingertips...

- 1 Easily print comprehensive compliance reports in seconds from any printer
- 2 Build reports to conduct self audits, plan compliance budgets, and schedule tasks
- 3 Reports are generated in a searchable and sortable PDF format, easy to email and review

*"Argent's compliance tracking system is exactly the solution we needed to get the staff on board with compliance tasks. Now we have an easy way to manage multiple environmental and compliance tasks without having to worry about regulations updating or tasks changing. The Argent system automatically tells us when a task is due and when a new regulation comes out or is changed. For the price, this is the best system of its kind out there."*

## **Argent** Evergreen Compliance Manager – ECM 3.0

### *System Features and Specifications*

#### **Operating Interface**
